

**AMENDMENTS TO THE SPECIFICATION**

Please amend the following paragraph has been added at line 33:

Fig. 1 illustrates an embodiment of the present invention in which a business (company) 100 contracts 102 with client 101 to ~~include~~open telecommunication connections and install monitoring devices used in monitoring through telecommunication services 103 and also the monitoring and maintenance of these devices and services 104, 105. The business further performs the payment for these services to a third party, if necessary, and invoices the client with a bill 106. The bill can be a single bill for all services and work rendered. The client can then pay the invoice 107.
